Dear Sir/Madam,

Application for Software Engineering Internship

I am writing to express my interest in the Software Engineering Internship position. As a passionate and detail-oriented third-year undergraduate student at Kaatsu International University (KIU), pursuing a BSc (Hons) in Software Engineering, I believe my skills and experiences make me a strong candidate for this opportunity.

Throughout my academic career and personal projects, I have developed hands-on experience in backend and full-stack development using Java, Spring Boot, and React.js. My recent projects include systems such as a Driving License Trial Testing System using TensorFlow and OpenCV, a Clinic Billing Management System, and a Hotel Booking System, all of which showcase my ability to build practical, real-world software solutions with secure and efficient backends. I am also proficient in MySQL and MongoDB, with a good understanding of REST APIs, SDLC processes, and Agile methodologies.

In addition to my technical capabilities, my experience working as a Customer Service Representative at Gamma Pizzakraft Lanka has helped me build strong communication and teamwork skills, essential for collaborative software development environments.

I am enthusiastic about applying my skills in a professional setting, where I can contribute meaningfully to your development team while continuing to grow as a software engineer. I would be grateful for the opportunity to discuss how I can bring value to your organization. I am available for an interview at your convenience and can be reached at +94 76 459 4961 or via email at pathmanadhanarigaran16@gmail.com.

Thank you for considering my application. I look forward to the possibility of contributing to your esteemed company.

Yours sincerely,
Hariharan
